

Technical Indicators

Item	Unit	Index
Appearance		Milky white or pale color aqueous dispersion
Solid content	%	60±2
Surfactant	%	4.0~7.0
PH value		8~10
Viscosity	10-3Pa·s	20~40

Features: Suitable for various additive mixing processing techniques, contains a moderate concentration of surfactant, good wetting and adhesion capabilities and have a higher molecular weight.

Applications: Fiber glass impregnation, production of high and medium grade non-stick coatings.

Packing: Packed in 25kg or 1000kg drums, or according to users' requirements.

Storage and Transportation: This product is a non-dangerous product. Avoid severe vibration during transportation, Avoid high temperature, sunlight and rain. Can not be used or stored below 0°C. If stored more than three months, shake the packaging regularly every week to prevent sedimentation.
