

## Technical Indicators

Item	Unit	Index
Appearance		Milky white or pale color aqueous dispersion
Solid content	%	60±2
Surfactant	%	4.0~7.0
PH value		8~10
Viscosity	10-3Pa·s	20~40

**Features:** It has good water affinity properties and dispersion, can be mixed with other products.

**Applications:** Glass fiber cloth impregnation.

**Packing:** 25kg or 1000kg/drum.

**Storage and Transportation:** Avoid violent vibrations during the transportation, avoid high temperature sunlight, prevent resin agglomeration. Cannot be used or stored below 0°C.

If stored more than three months, shake the packaging barrel regularly every week to prevent sedimentation.

It should be stored in a clean, cool and dry warehouse to prevent agglomeration and precipitation of the resin and also prevent the mixing of water vapor, dust and other impurities.
