

## Technical Indicators

| Item                   | Unit     | Index  |
|------------------------|----------|--|
| Transparent appearance |          | Milky white or light yellow aqueous dispersion |
| Contained              | %        | 60±2   |
| Surfactant content     | %        | 1.0~4.0  |
| pH value               |          | 8~10   |
| Viscosity              | 10-3Pa·s | 10~35  |

**Features:** Low in surfactant content, product with higher whiteness can be obtained with suitable impregnated glass fiber cloth.

**Applications:** Glass fiber impregnation, can produce plastic flame retardants.

**Packing:** Packed in 25kg or 1000kg drums, or according to users' requirements.

**Storage and Transportation:** This product is a non-dangerous product. Avoid severe vibration during transportation, Avoid high temperature, sunlight and rain. Can not be used or stored below 0°C. If stored more than three months, shake the packaging regularly every week to prevent sedimentation.
