

Product Name	2-Fluorophenol
Molecular Formula	C <sub>6</sub> H <sub>5</sub> FO
CAS No.	367-12-4
EC No.	206-681-2
Appearance	Liquid
Packaging	25kg/25kg/50kg/100kg/1000kg
HS Code	29081000
Class/UN No.	UN1993
Hazard class	3
Packing group	III

**Applications:**

2-Fluorophenol is a phenol derivative. Phenol is an important basic organic raw material, and many of its downstream products are involved in many fields, mainly used in the manufacture of phenolic resin, bisphenol A and caprolactam. And the derivatives of phenol such as halogenated phenol, nitrophenol, alkyl phenol can be used in medicine, pesticide, paint, dye, explosives, spices and other production. Phenol compounds exist widely in nature, spices and many natural products contain phenol structure.
