

Sr.	Name	Boiling point-NTP	Form	Purity (other content can be customized)	CAS NO./Formula	Application	Product picture
1	Perfluorobutyl Ethylene	59-60°C	Colorless transparent liquid 20°C	≥98%	19430-93-4 Category C4 $C_4F_9CH=CH_2$	Fluorine-containing intermediates, chemical reagents, fine chemicals, pharmaceutical intermediates, material intermediates, used for polymerization reactions and preparation of emulsifiers.	
2	Perfluorohexyl Ethylene	102-104°C	Colorless transparent liquid 20°C	≥98%	25291-17-2 Category C6 $C_6F_{13}CH=CH_2$	Fluorine-containing intermediates, chemical reagents, fine chemicals, pharmaceutical intermediates, material intermediates, used for polymerization reactions and preparation of emulsifiers	
3	Perfluorooctyl Ethylene	148-149°C	Colorless transparent liquid 20°C	≥98%	21652-58-4 Category C8 $C_8F_{17}CH=CH_2$	Fluorine-containing intermediates, chemical reagents, fine chemicals, pharmaceutical intermediates, material intermediates, used for polymerization reactions and preparation of emulsifiers	
4	Perfluoroalkyl Ethylene	149-320°C	Colorless transparent liquid 20°C	≥95%	67659-47-4 Category Cn $C_2F_5(C_2F_4)_n$ $H=CH_2$ n=2,3,4...	Fluorine-containing intermediates, chemical reagents, fine chemicals, pharmaceutical intermediates, material intermediates, used for polymerization reactions and preparation of emulsifiers
