

Sr.	Name	Boiling point-NTP	Form	Purity (other content can be customized)	CAS NO./ Formula	Application	Product picture
1	2-(Perfluorobutyl) Ethyl Acrylate	164°C	Colorless transparent liquid 20°C	≥98%	52591-27-2 Category C4 $C_4F_9CH_2CH_2$ $OCOCH = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
2	2-(Perfluorobutyl) Ethyl Methacrylate	55°C 3mmHg	Colorless transparent liquid 20°C	≥98%	1799-84-4 Category C4 $C_4F_9CH_2CH_2$ $OCO(CH_3)C = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
3	2-(Perfluorohexyl) Ethyl Acrylate	67-68°C 2mmHg	Colorless transparent liquid 20°C	≥98%	17527-29-6 Category C6 $C_6F_{13}CH_2CH_2$ $OCOCH = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
4	2-(Perfluorohexyl) Ethyl Methacrylate	70-71°C 4mmHg	Colorless transparent liquid 20°C	≥98%	1799-84-4 Category C4 $C_6F_{13}CH_2CH_2$ $OCO(CH_3)C = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
5	2-(Perfluorooctyl) Ethyl Acrylate	80-81°C 2mmHg	Colorless transparent liquid 20°C	≥95%	27905-45-9 Category C8 $C_8F_{17}CH_2CH_2$ $OCOCH = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
6	2-(Perfluorooctyl) Ethyl Methacrylate	94-95°C 3mmHg	Colorless transparent liquid 20°C	≥95%	1996-88-9 Category C8 $C_8F_{17}CH_2CH_2$ $OCO(CH_3)C = CH_2$	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
7	Perfluoroalkyl Ethyl Acrylate	100-220°C 10mmHg	Colorless transparent liquid 20°C	≥93%	65605-70-1 Category Cn $C_2F_5(C_2F_4)_n$ H_2CH_2OCOC H = CH_2 n=2,3,4...	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field	
8	Perfluoroalkyl Ethyl Methacrylate	— 10mmHg	Colorless transparent liquid 20°C	≥93%	65530-66-7 Category Cn $C_2F_5(C_2F_4)_n$ $H_2CH_2OCO(CH_3)C = CH_2$ n=2,3,4...	Important intermediate for surface protective agents production, widely used in textiles, coatings and fluorine-containing surfactants field
