

Sr.	Name	Boiling point-NTP	Form	Purity (other content can be customized)	CAS NO./Formula	Application	Product picture
1	2,2,3,3-Tetrafluoro oxetane	28°C 760mm Hg	Colorless transparent liquid 20°C	≥95%	765-63-9 Category C4 C ₃ H ₂ F ₄ O	Mainly used in production of fluoroether and anti-fingerprint agent	
2	Potassium Perfluoro-1-Butanesulfonate	300°C 760mm Hg	White or light yellow crystalline powder	≥95%	29420-49-3 C ₄ F ₉ SO ₃ K	It is perfluorinated anionic surfactant which has the general characteristics of fluorinated surfactant, widely used for flame retardant of synthetic material, especially the best flame retardant for polycarbonate materials.	
3	Potassium Perfluorohexanesulfonate	285°C 760mm Hg	White or light yellow crystalline powder	≥95%	3871-99-6 C ₆ F ₁₃ SO ₃ K	It is perfluorinated anionic surfactant, mainly used as chromium mist inhibitor in electroplating, humectant and additive in fluoroprotein foam fire extinguishing agent.	
4	Perfluorobutane Sulfonyl Fluoride	65-66°C 760mm Hg	Colorless or light yellow liquid 20°C	≥95%	375-72-4 C ₄ F ₁₀ O ₂ S	Mainly used for the synthesis of fluorine-containing carbon surfactant, fluorine-containing pesticides, dyes, polycarbonate processing dispersants etc..	
5	Perfluorohexane Sulfonyl Fluoride	114°C 760mm Hg	Colorless transparent liquid 20°C	≥95%	423-50-7 C ₆ F ₁₄ O ₂ S	Mainly used for the synthesis of fluorine-containing carbon surfactant, fluorine-containing pesticides, dyes, polycarbonate processing dispersants etc.	
6	Perfluorooctane Sulfonyl Fluoride	154-155°C 760mm Hg	Colorless transparent liquid 20°C	≥95%	307-35-7 C ₈ F ₁₈ O ₂ S	Mainly used for the synthesis of fluorine-containing carbon surfactant, fluorine-containing pesticides, dyes, polycarbonate processing dispersants etc.
