

Perfluorohexyl Iodide (C₆F₁₃I)

Product Name	Perfluorohexyl Iodide
Synonyms	Perfluorohexyl Iodide; 1-Iodoperfluorohexane Tridecafluorohexyl Iodide
Molecular Formula	C ₆ F ₁₃ I
CAS No.	355-43-1
EC No.	206-586-6
Appearance	Pale Pink Liquid
Packaging	HDPE Drum
HS Code	29034700

Applications:

Perfluorohexyl Iodide is a key intermediate in the production of fluorinated surfactants and low surface energy coatings. Perfluorohexyl iodines are also organic synthesis intermediates and pharmaceutical intermediates which can be used in laboratory research and development process and chemical and pharmaceutical production process.
